Vaccination Record Card for Category A Workers (including Students)

INSTRUCTIONS

Enough information must be provided to enable an assessor to verify that an appropriate vaccine has been administered by a registered vaccination provider therefore:

- Providers should record their full name, signature, date specific vaccine given and official provider stamp at the time of vaccine administration.
- Record batch numbers where possible.
- Serological results should be recorded on the card as numerical values or positive/negative, as appropriate, not simply “immune”.
- Copies of vaccination records (e.g. childhood vaccinations) and copies of relevant pathology reports may be attached to the card, if available.
- Attach another card if additional recording space is required.
