Workforce requirement for NSW medical workforce by 2040

Workforce modelling indicates the need for some growth in the medical workforce by around **165 to 212** new NSW doctors per annum entering the workforce to meet community need in 2040 across both low and high demand scenarios.

Demand is expected to grow **2.2%** (low demand scenario) to **2.3%** (high demand scenario).

In 2040 the average fellow will be 47.2 years old (if new entries enter the workforce).

Workforce considerations

- Workforce modelling is based on current models of care. Any change in the models may impact on requirements.
- Any changes to current training programs will affect the workforce modelling outcome.
- Workforce modelling is based on current workforce hours profile by age co-hours. Any changes to hours worked by future clinicians will affect the model.
- There is an accepted error rate of plus or minus two per cent within workforce modelling.
- The model does not address any mal-distribution either by location (rural or regional) or sector (public or private).
